

BARCLAY

M E C H A N I C A L

Barclay Mechanical is a heavy industrial general contractor. Established in 1980, Barclay has become a leading mechanical contractor – working all over the country in the energy, food processing, production and agricultural sectors. Two of Barclay's main focuses are ASME certified weld process piping and industrial construction. We also fabricate and install structural steel, conveyor systems, sheet metal and plate products, food processing equipment, mine and agricultural equipment, NBIC certified boiler and pressure vessel fabrication and repair, as well as numerous, custom industrial metal products. Barclay's famously high-skilled welders are a product of its proven standard of excellence.
